

Bobcat Buy and Oracle Update

There is a lot of change going on at UC Merced - **Bobcat Buy is still here for you!** In fact, we're expanding capability to serve you better as we transition the underlying technology to the Oracle platform and create a one stop shop for all types of procurement. This includes:

- Adding even **more catalogs** so you can easily access the vendors and products you need
- Adding smart forms to streamline non-catalog purchases for routine products and services
- Adding generic requisitions for power users for all other procurement needs
- Improvements in **real-time exchanges** – reducing delays in financial data and simplifying back office accounting tasks, encumbrances and reporting

Be on the lookout for more updates from Procurement Services!

You can also find more information on the Bobcat Buy and Alpha Financials Project websites.
